

# File I/O

<b>Library</b>	#include <file.IO.h>
----------------	----------------------

<b>Variables and konstants</b>	<b>FILE</b> *file;	<i>Holder of the file</i>
	<b>fpos_t</b> pos;	<i>Stream position (where we are reading in the file)</i>
	<b>EOF</b>	<i>Konstant that indikates the “end of file”</i>

<b>Access</b>	file = <b>fopen</b> ( "c:\\test.txt", "r" );	<i>FILE *<b>fopen</b>(const char *filename, const char *mode)</i>
	file = <b>freopen</b> ( "c:\\test2.txt", "r" ); /* Do stuff */	<i>FILE *<b>freopen</b> ( const char *filename, const char *mode, FILE * stream );</i>
<b>Modes</b>	<b>fclose</b> ( file );	<i>/* Do stuff */</i>
		<i>int <b>fclose</b>(FILE *a_file)</i>
<b>Modes</b>	<i><b>r</b> - open for reading</i>	
	<i><b>w</b> - open for writing (file need not exist)</i>	
	<i><b>a</b> - open for appending (file need not exist)</i>	
	<i><b>r+</b> - open for reading and writing, start at beginning</i>	
	<i><b>w+</b> - open for reading and writing (overwrite file)</i>	
	<i><b>a+</b> - open for reading and writing (append if file exists)</i>	

## Reading

<b>Character</b>	int c = <b>fgetc</b> ( file );	<i>int <b>fgetc</b> (FILE *fp)</i>
<b>Block of data</b>	<b>fread</b> ( container_ptr, size_of_elements, number_of_elements, file );	<i>size_t <b>fread</b>(void *ptr, size_t size_of_elements, size_t number_of_elements, FILE *a_file)</i>
<b>Formated data</b>	<b>fscanf</b> ( file, “%s”, char_container )	

## Wrighting

<b>Character</b>	<b>fputc</b> ( 'char', file );	<i>int <b>fputc</b>( int c, FILE *fp )</i>
<b>Block of data</b>	<b>fwrite</b> ( container_ptr, size_of_elements, number_of_elements, file );	<i>size_t <b>fwrite</b>(const void *ptr, size_t size_of_elements, size_t number_of_elements, FILE *a_file)</i>
<b>Formated data</b>	<b>fprintf</b> ( file, “stuff I want to wright” );	

## Stream Manipultion

<b>Rewinding stream</b>	<b>rewind</b> ( file );	<i>void <b>rewind</b>( FILE *stream )</i>
<b>Reading the current stream position</b>	<b>fgetpos</b> ( file, &pos );	<i>int <b>fgetpos</b> ( FILE * stream, fpos_t * pos );</i>
<b>Restoring the stream position</b>	<b>fsetpos</b> ( file, &pos );	<i>int <b>fsetpos</b> ( FILE * stream, const fpos_t * pos );</i>
